

Product name	Lat Pulldown	Model No.	AN04
--------------	--------------	-----------	------

Picture

Technical  
description  
n

- Main frame: it is welded with 60 \* 120 \* t3mm positive elliptical pipe diameter, with stable appearance and atmospheric shape.
- Movement track: the smooth movement track is more consistent with the principles of biomechanics and ergonomics.
- Guard board: the whole front guard board of the small door is made of acrylic plastic, and the back guard board is made of Q235 national standard coldrolled sheet.
- Cushion: excellent 3D polyurethane molding process; the surface is made of super fiber leather, waterproof and wearresistant; the color can be matched at will.
- Handle: PP soft rubber material, more comfortable to grip.
- Wire wheel: it is made of high quality PA material by injection molding, with national standard high quality bearing, quiet, smooth and fatigue resistant.
- Steel cable: high quality wearresistant special steel wire rope, 6mm in diameter, wrapped with PU wearresistant layer, 7 \* 19 high quality steel wire.

Lat Pulldow Size: L1250 W860 H2330mm N.W: 335kgs Training position: dorsi latissimus triangle muscle group			
Product name	Pectoral Machine	Model No.	AN05

Cushion: excellent 3D polyurethane molding process; the surface is made of super fiber leather, waterproof and wear-resistant; the color can be matched at will.
- Handle: PVC soft rubber material, more comfortable grip.
- Wire wheel: it is made of high quality PA material and injected with national standard high quality bearing, quiet, smooth and fatigue resistant.
- Steel cable: high quality wear-resistant special steel wire rope, 6mm in diameter, wrapped with PU wear-resistant layer, 7 \* 19 high quality steel wire.

Incline Chest Press 坐式上斜推胸训练器  
 Size: L1360 W1610 H1520mm N.W.: 220kgs  
 Training position: chest, trapezius, triceps

Product name	Standing Calf	Model No.	AN48
--------------	---------------	-----------	------

Picture

Technical description

- Main frame: it is welded with 60 \* 120 \* t3mm positive elliptical pipe diameter, with stable appearance and atmospheric shape.
- Trajectory: the smooth trajectory is more in line with the principles of biomechanics and ergonomics. Guard board: the whole front guard board of the small door is made of acrylic plastic, and the back guard board is made of Q235 national standard coldrolled sheet. Cushion: excellent 3D polyurethane molding process; the surface is made of super fiber leather, waterproof and wearresistant; the color can be matched at will.
- Handle: PVC soft rubber material, more comfortable grip.
- Wire wheel: it is made of high quality PA material and injected with national standard high quality bearing, quiet, smooth and fatigue resistant.
- Steel cable: high quality wearresistant special steel wire rope, 6mm in diameter, wrapped with PU wearresistant layer, 7 \* 19 high quality steel wire.

Standing Calf Size: L1350 W1130 H1930mm N.W.: 220kgs  
 Training position: calf muscle group

Product name	Triceps Dip	Model No.	AN49
--------------	-------------	-----------	------

**Seated Calf Raise**

Size: L1360 W1000 H1500mm N.W.: 265kgs

Training position: calf muscle group

Product name	Muti Functional Trainer	Model No.	AN54
--------------	-------------------------	-----------	------

Picture

Technical description

- Technology: the product appearance design absorbs the foreign advanced design concept, improves on the original basis, more in line with the fitness needs of Chinese people.
- Main frame: the oval tube of 60 \* 120 \* t3mm is used as the tube, which highlights elegance and fashion. The thickness of the main tube is 2.5mm.
- Weight piece: the counterweight adopts strong magnetic bolt, which makes the adjustment in motion more convenient and safe.
- Wire wheel: it is made of high quality PA material and injected with national standard high quality bearing, quiet, smooth and fatigue resistant.
- Steel cable: high quality wearresistant special steel wire rope, 6mm in diameter, wrapped with PU wearresistant layer, 7 \* 19 high quality steel wire.

MutiFunction Trainer/FTS Glide Size: L2020 W1280 H2415mm

N.W.: 350kgs

Training position: pectoralis major muscles, chest muscles, back muscles, arm muscles

Product name	Standing Rear Delt	Model No.	AN74
--------------	--------------------	-----------	------

- Trajectory: the smooth trajectory is more in line with the principles of biomechanics and ergonomics. Guard board: the whole front guard board of the small door is made of acrylic plastic, and the back guard board is made of Q235 national standard coldrolled sheet. Handle: PP soft rubber material, more comfortable to grip.
- Wire wheel: it is made of high quality PA material and injected with national standard high quality bearing, quiet, smooth and fatigue resistant.
- Steel cable: high quality wearresistant special steel wire rope, 6mm in diameter, wrapped with PU wearresistant layer, 7 \* 19 high quality steel wire.

Standing Rear Delt    Size: L1205    W902    H1854mm    N.W.: 243kgs  
 Training position: deltoid muscle group

Product name	Plate Tree	Model No.	AN01
--------------	------------	-----------	------

Picture

Technical description

- Technology: the product production adopts international highend production technology laser cutting, automatic manipulator welding, various CNC bending machine tools and other production equipment to achieve cuttingedge standard tooling.
- Main frame: it is welded with 60 \* 120 \* t3mm positive elliptical pipe diameter, with stable appearance and atmospheric shape.
- Storage: large storage space, can store 7 sets of barbell chips at the same time.
- bell bar: made of highquality PA material, onetime injection molding, with higher strength.。

Plate Tree Size: L880 W760 H970mm N.W.: 31kgs

Product name	Dumbbell Rack	Model No.	AN02
--------------	---------------	-----------	------
