

1. This product absorbs foreign high- end design inspiration, the overall shape is beautiful, subversive column design combined with the most popular creative elements, instantly highlights the treadmill's dignity and luxury.
2. The design of center console supported by ultra-wide aluminium alloy column provides a stable and reliable working platform for users.
3. The emergency brake switch is equipped with a safety clip and a tether, which is located in a prominent position below the front end of the armrest for easy use by the operator. It is safe and reliable to stop operation immediately when emergency power failure occurs. The heart rate monitoring device designed on the handle can detect the user's heart rate in real time and feedback the user's ideal heart rate state in time.
4. The design of the kettle rack on the left side of the central console is divided into two parts. It can not only place round kettles to facilitate users to replenish water in time, but also place keys, membership cards and other small items for easy access. The long storage tank designed in the middle position can hold mobile phones, tablets and other items, while doing sports while chasing dramas, sports and entertainment are both going on. On the right side of the slot, a wireless charging function is designed, which eliminates the user's charging worries. At the same time, the instrument table has designed a fast direct selection button, which facilitates users to choose slope and speed quickly, and brings users different experience.
5. Unique fan design under the display screen, using automobile -grade drum fan, large volume of wind, gentle wind, one-button switch, so that users can experience the pleasure of spring breeze while running.
6. The runway adopts a high elastic silica gel shock absorber system, a new design concept, with a widened runway structure, so that the athletes can reduce knee injury in the intense sports environment.

SHANDONG MINOLTA (MND) FITNESS CO., LTD

Ningjin Development Zone, Ningjin Town, 253400 Dezhou, Shandong, China.

- Incline range: -3% to +15%
- Speed range: 1-20km/h
- 9 preset workout programs
- Drive motor: 3HP high power motor (220V, 60HZ, 9.8A)
